

PUPCOIN

is a starting point for your success

WHITE PAPER | PUP| BINANCE SMART CHAIN

www.pupcoine.com

INTRODUCTION

What is PUPCOIN?

PUP is a decentralized meme token on Binance Smart Chain which is going to be trended in the crypto world very soon. It will be traded with low fees so that nobody lefts to be involved in this project. PUP is on a mission to bring popular cryptocurrency concepts to the mainstream in one, easy to understand project.

PUP is in it for the long haul. The decentralized community is fostering long-term development of the ecosystem which will result in real use cases, greater rewards and a popularity beyond any temporary trends.

We believe that community is the commerce of the future. Imagine a tokenmunity coming together with the singular common focus of increasing the wealth of everyone involved! The blockchain is the perfect mechanism to allow this to happen. Talk about a dream come true! These are the reasons why we had to create, develop and launch the PUPCOIN

PROJECT & VISION

Most of the people who deal with cryptocurency are here to make money, wondering about earning huge income. And this is quite understandable. However, there is a good point that is often neglected - coins or tokens without strong support for the project are unlikely to reach . That's why we're here - to make this real. We have combined large, real token projects with use cases. Our roadmap is a unique invention - we define stages not by timeframes, but by a lead value system! We will provide new projects without killing, so that more and more people trade our TOKEN.

The PUP TEAM has laboured tirelessly to summon tokenomics that grant the wishes of his faithful followers. PUPCOIN offers a selection of delightful tokenomics, both healthy and decadent!

Advantages of the Binance smart chain

Binance smart chain is well known for less gas fee and speedy transactions. It's a sovereign block-chain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.
